

# MY FIRST BOT

WITH MICROSOFT BOT FRAMEWORK

## MIGUEL ANGEL RUIZ ALVAREZ

- Developer since 2010 working with the .NET mainly in Web stack such ASP.NET Web Forms, MVC and Web Api.
- Currently working for EPAM Systems Mexico as a Software Engineer.
- I like to learn about new released and in progress technologies.

# WHAT IS A BOT?

- **Wikipedia:** A bot (short for "robot") is a computer program, imitating the behavior of a human.
- **Techterms:** A bot is an automated program that runs over the Internet. Some bots run automatically, while others only execute commands when they receive specific input.

# WHAT IS THE BOT FRAMEWORK?

## What?

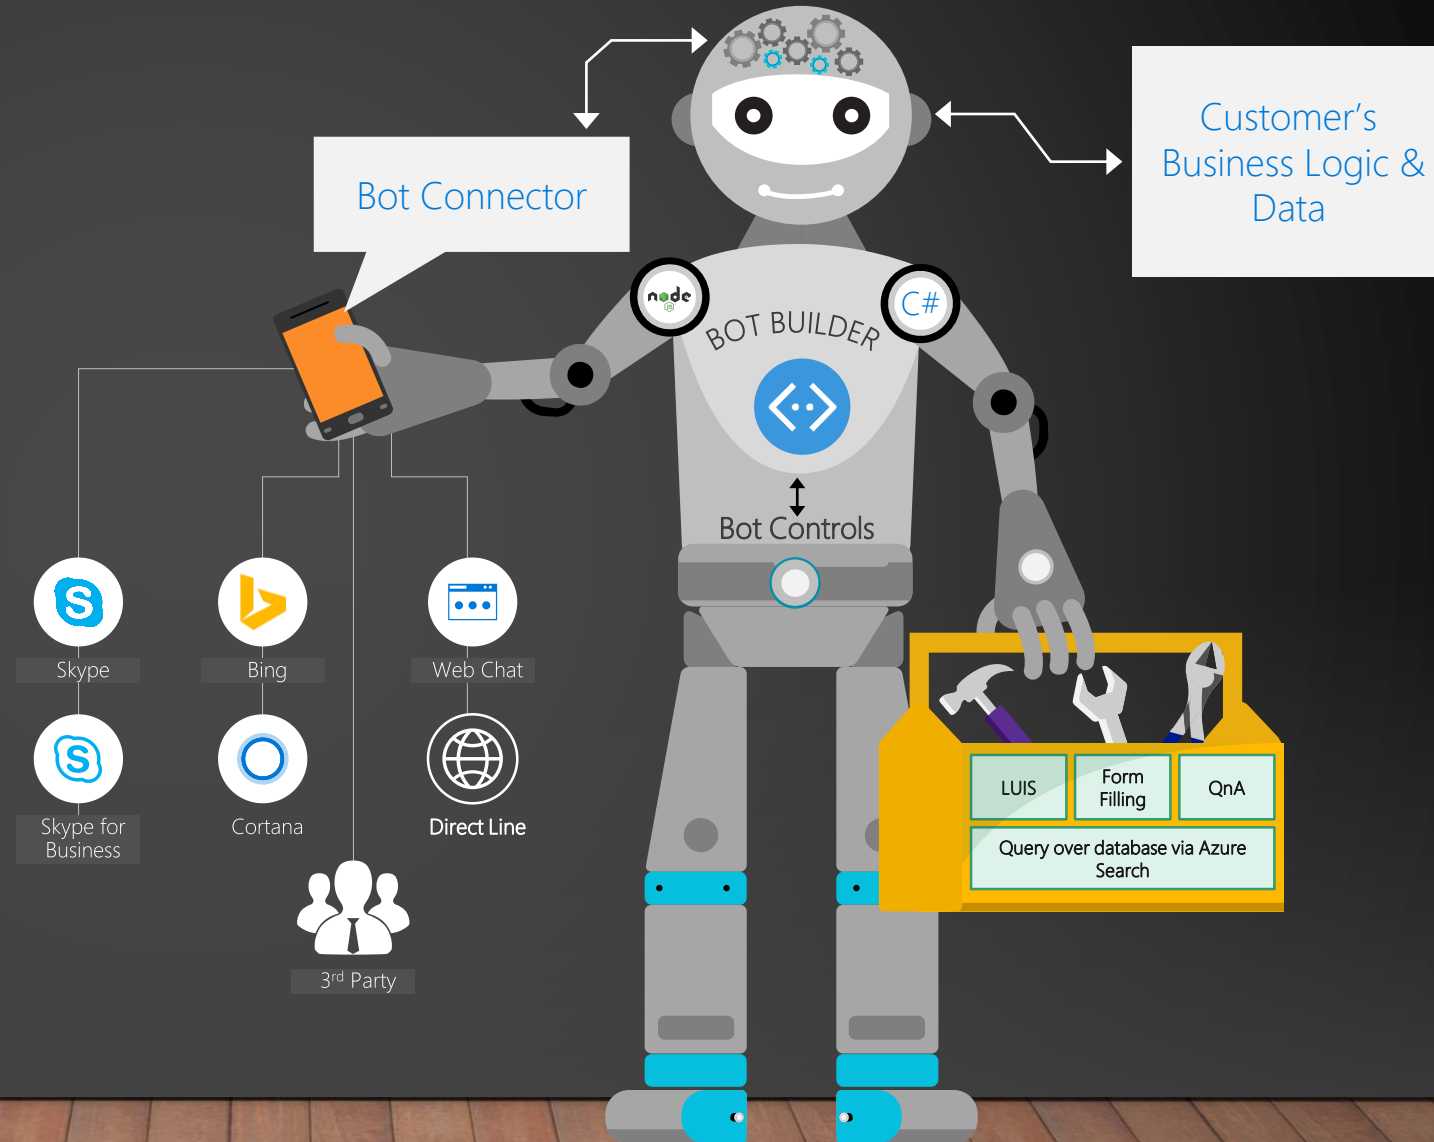

- Tools for building REST Web Sites
- Mechanisms for handle dialogs
- Easy to debug and analyze

## Why?

- Implements standard protocols
- Modeling conversations is hard. Tools help!
- UI across multiple canvases is hard. Adaptive Cards rock!
- Common and well understood patterns

## Goals

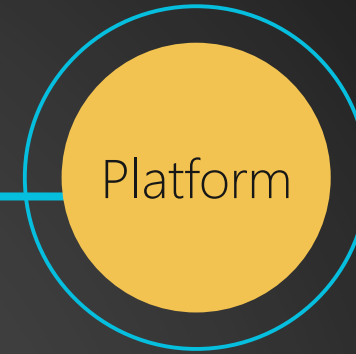

- Start Simple. Add Complexity after.
- Bot adapts to the user, based on context

REST Endpoint

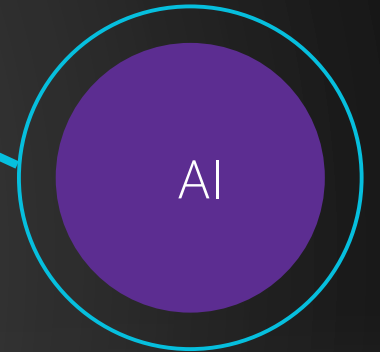

REST Endpoint

Platform

Platform Services

Intelligent Tools

Bot Builder SDK

## Key concepts in the Bot Builder SDK

### Connector

Provides a single REST API that enables a bot to communicate across multiple channels.

### Activity

Object to pass information back and forth between bot and channel. The most common is message.

### Dialog

Models a conversation and manage conversation flow. The dialog context maintains the stack of dialogs that are active in the conversation.

# GROWTH

10,000,000+ Messages / day

1,000,000+ Unique users / day

100,000+ Developers

10,000+ Active bots

1,000+ Companies

\* Numbers from Build 2017

Let's Start

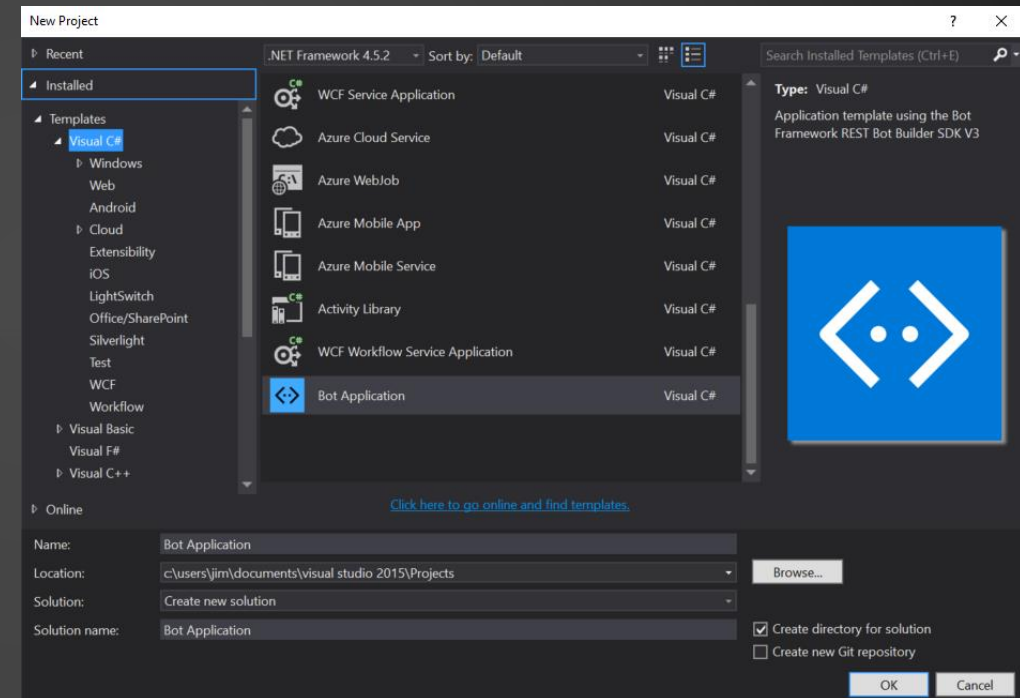

# PREREQUISITES

- Install Visual Studio 2015/2017
- In Visual Studio, update all extensions to their latest version
- Download and install the **Bot Application**, **Bot Controller**, and **Bot Dialog** .zip files.
  - Visual Studio 201x\Templates\ProjectTemplates\Visual C#\
- Install the Bot Framework Emulator

# CREATING THE BOT PROJECT

- Add new project
  - Templates/Visual C#/Bot Applications
- Restore and update Nuget Packages

DEMOS

# PUBLISHING A BOT

- Register your bot in <https://dev.botframework.com/bots>
- Get App Id and App password for your bot
- Deploy your bot rest service(set the Id and password in web.config file)
- Test your bot in with the Web Chat tool
- Enable the channels of your preference

# RESOURCES

- Bot Framework:
  - Page: <https://dev.botframework.com/>
  - Documentation: <https://docs.microsoft.com/en-us/bot-framework/>
  - Emulator: <https://docs.microsoft.com/en-us/bot-framework/debug-bots-emulator>
- Bot Builder:
  - SDK Repository: <https://github.com/Microsoft/BotBuilder>
  - Samples: <https://github.com/Microsoft/BotBuilder-Samples>
- Channel 9:
  - What's new with the Microsoft Bot Framework: <https://channel9.msdn.com/events/Build/2017/B8097>
- Demo Thumbnail Bot :
  - Add to skype: <https://join.skype.com/bot/21115136-2ece-49e0-a434-cab4306cccf3>
